

ABOUT ME

Kabul born coder. Agile at heart. Builder of clean, step by step systems.

I don't just write code, I break complexity into small wins. First, I fully grasp the task. Then, I split it into logical subtasks. Then, I execute, one methodical step at a time. My approach blends agile discipline with team first collaboration and a relentless eye for detail. I turn ambiguity into clarity, then clarity into shipped work.

Outside the terminal? I'm chasing the next tech trend cloud, AI, whatever moves fast. I learn constantly, not because I have to, but because I want to stay sharp and bring fresh solutions to every project.

Driven by precision. Guided by growth. Focused on delivery.
